Keywords & Searching Tips
When searching for information through an electronic database or Internet search engine, you may find more or stronger resources by using the following tips:

When looking for a particular phrase, such as Ancient Egypt, surround the phrase with quotation marks (“Ancient”). This ensures that your results will include this entire phrase, rather than just “Ancient” or “Egypt.”

If you do not want something in your results, put a minus sign (-) in front of it. For example, if I do not want information regarding Pyramids in my Ancient Egypt search, I could type: “Ancient Egypt” - Pyramids.

If you want to search for more than one phrase at the same time, use the word “OR” between the phrases. For example, if I searched “Ancient Egypt” OR “Hieroglyphics,” I can locate materials that use either of these phrases.

You can narrow down your search even further by using the word “AND.” If I want to research King Tut in Ancient Egypt, I can search “Ancient Egypt” AND “King Tut” to get more appropriate results.

Try using the following search terms to locate various materials regarding Ancient Egypt.

- Ancient Egypt
- Pyramid
- Mummification
- Sphinx
- Cleopatra
- Ramesses
- Nile River
- Hieroglyphics or hieroglyphs
- Ra, Isis, Osiris (and other gods and goddesses)
- Pharaoh
- Ankh
- Archaeology
- Hatshepsut
