GPL adds VOX books to collection

Audio-enabled picture books offered at Greenwood Public Library

Greenwood Public Library (GPL) is excited to offer a brand new format of book for kids – VOX books. VOX Books combine picture books and non-fiction books with audio recordings that help engage children and encourage literacy development.

VOX Books have a permanently attached VOX reader which turns ordinary print books into an all-in-one read-along. There's no need for tablets, computers, or CDs. Children simply push a button to listen and read.

GPL is currently adding 100 VOX Books titles to their collection and plan to add to the collection throughout the year.

A VOX Books demonstration video can be found on GPL's YouTube page: <https://www.youtube.com/c/greenwoodpubliclibrary>
